# TEST YOUR KNOWLEDGE

# TEST YOUR KNOWLEDGE BY ANSWERING 'TRUE' OR 'FALSE'

**FALSE**

**TRUE**

- |  |  |  |
|--|--|--|
| 1. Older people get AIDS easier than young healthy people.   | <input type="checkbox"/><br><input type="checkbox"/> | <input type="checkbox"/><br><input type="checkbox"/> |
| 2. HIV is found in body fluids, blood and on the skin.   |  |  |
| 3. A person may get HIV by sticking their skin with a needle that someone else has used.                       | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 4. Only people who are bad get AIDS.   | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 5. You can get HIV by sitting on a toilet seat that a person with Aids has used.                               | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 6. A person can have a negative HIV result from a blood test and still be infected with HIV.                   | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 7. People who are infected with HIV look very thin and are sickly.   | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 8. Once you are HIV-infected you are infected for life.  | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 9. No grown-up person has actually tested HIV+ and been infected with the virus and later turned negative.     | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 10. You can get HIV from a mosquito bite.  | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 11. There is no way you can find out if you are HIV positive or not.   | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 12. It is not dangerous to HUG a person with AIDS.   | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 13. Someone can spread HIV and AIDS by coughing and sneezing on you.   | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 14. People infected with HIV usually don't know it and do not look sick at first.                              | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 15. You can be cured of HIV and AIDS if you go to the right doctor and take strong medicines.                  | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 16. You can get AIDS by sharing needles for ear-piercing, tattooing or circumcision.                           | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 17. It is difficult for girls and women to get AIDS.   | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 18. Small babies can be born with HIV.   | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 19. A person may get HIV by giving blood in a blood bank.  | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 20. A person may get HIV by having a blood transfusion.  | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 21. A person is able to pass the HIV virus on to others only if he/she has AIDS.                               | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 22. AIDS attacks more white people than people who have colour in their skin.                                  | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 23. AIDS is a homosexual disease.  | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 24. HIV cannot be contracted by sexual molestation.  | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 25. A person may pass on HIV to someone else even if that person has no sickness and looks absolutely healthy. | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 26. The main way to get HIV is having sex with an infected person.   | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 27. Teenagers infected with HIV when they are 14 years old may not get sick until they are into their 20s.     | <input type="checkbox"/>                             | <input type="checkbox"/>                             |
| 28. People with black or darker skin are more likely to get HIV  |  |  |

- |  |                          |                          |
|--|--------------------------|--------------------------|
| and AIDS   | <input type="checkbox"/> | <input type="checkbox"/> |
| 29. If you are sure you know your boyfriend or girlfriend well before having sex with them, then you are safe from HIV and AIDS.   | <input type="checkbox"/> | 40                       |
| 30. You can tell if a person has HIV or AIDS by how they look.   | <input type="checkbox"/> |                          |
| 31. There is no way you can protect yourself against HIV and AIDS.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 32. If you have sex with only one person, you can't get AIDS.  | <input type="checkbox"/> | <input type="checkbox"/> |
| 33. Using a condom is safe sex and you won't get AIDS if you use it.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 34. Christians should balance moral education with condom education.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 35. People with AIDS should stay in hospitals all the time.  | <input type="checkbox"/> | <input type="checkbox"/> |
| 36. AIDS is the biggest killer of teenagers.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 37. People who are ill with AIDS should be encouraged to do what they can for themselves and should be supported by their friends. | <input type="checkbox"/> | <input type="checkbox"/> |
| 38. We should be afraid of AIDS and people with AIDS because it is scary.  | <input type="checkbox"/> | <input type="checkbox"/> |
| 39. There is now a new cure for HIV and AIDS.  | <input type="checkbox"/> | <input type="checkbox"/> |
| 40. Church people are never infected with HIV.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 41. More men infected women with HIV than women infected men.  | <input type="checkbox"/> | <input type="checkbox"/> |
| 42. Women can contract STDs and HIV easier than men.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 43. Professional people in urban areas have less HIV than do rural people.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 44. HIV infected persons can do many things to live longer and productively.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 45. Only medical people should be involved in HIV and AIDS care and education.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 46. People with HIV and AIDs should be isolated from the general public to stop the spread.  | <input type="checkbox"/> | <input type="checkbox"/> |
| 47. Education involving condoms is the most effective way to stop the HIV spread.  | <input type="checkbox"/> | <input type="checkbox"/> |
| 48. Education involving morals and lifestyle is the most effective way to stop the HIV spread.                                     | <input type="checkbox"/> | <input type="checkbox"/> |

## **TEST YOUR KNOWLEDGE – ANSWERS**

1. False
2. False (not on the skin)
3. True
4. False (all people)
5. False
6. True (can be in window period)
7. False (look healthy at first)
8. True (other than being healed by God)
9. True (unless healed by God)
10. False
11. False ( you can be tested)
12. True
13. False
14. True
15. False (no doctors can yet cure HIV & AIDS)
16. True
17. False (females can be infected more easily)
18. True
19. False
20. True (but rarely now - only one in 40,000 units of blood might possibly be infected with HIV)
21. False (all HIV-infected persons can infect someone else)
22. False
23. False (not only, in Africa it is spread more in the heterosexual population)
24. True
25. True
26. True
27. True (because HIV-positive persons can remain healthy for several years)
28. False (any person can be HIV positive)
29. False
30. False
31. False (you can abstain from sex if unmarried, or be faithful if married)
32. False (only safe if that person has never had sex with anyone previously and is not infected)
33. False (safer, but not 100% safe)
34. True (Christians should teach about the risk factors involving condoms)
35. False
36. True
37. True
38. False (not if we are educated about AIDS and understand it)
39. False
40. False
41. True (because more men than women have multiple sex partners)
42. True (because of their biological make-up)
43. False
44. True
45. False (everyone should be well informed)
46. False
47. False (moral education is the most effective)

48. True
